Personal Portfolio

Final-year Computer Science student with practical experience in software development, gained through internships specialising in machine learning, testing, and cloud-based solutions. Skilled in Python, Java, Groovy, and full-stack frameworks, with a passion for creating scalable solutions. I am eager to contribute to a development team that blends technical expertise with creative problem-solving.

EXPERIENCE

Machine Learning Researcher, University of Limerick

[Limerick, Ireland] [June 2025 – August 2025]

- Selected as a research scholar for the 13th S&E Summer Research Scholarship Programme
- Conducted independent research on 'Plant Leaf Disease Classification Using Image Processing Deep Learning-Driven Leaf Segmentation'
- Utilised the PlantVillage dataset to train and evaluate deep learning models for accurate plant disease identification with a 99% accuracy.
- Applied PyTorch, OpenCV, and scikit-learn for model development, data augmentation, and performance benchmarking.
- Focused on real-world applicability, comparing deep learning approaches with traditional ML for practical deployment.

Event Operations Assistant – Plant Engineering Workshop (PEW25), ETOPIA

[Zaragoza, Spain] [June 2025 – June 2025]

- Assisted in coordinating logistics for an international workshop attended by 200 delegates from industry leaders like Honeywell and Kaeser, and researchers.
- Managed registration management, communication and on-site operations to ensure a smooth event experience for attendees and presenters.
- Supported the preparation of promotional materials and scheduling, demonstrating organisational precision and teamwork.
- Developed strong interpersonal and communication skills through engagement with diverse international participants.
- Gained hands-on experience in stakeholder management and cross-cultural communication within a professional, high-profile setting.

Assoc Software Engineer Intern, ACI Worldwide

[Limerick, Ireland] [June 2024 – Jan 2025]

- Engaged in planning, developing and testing software systems and applications for product enhancements and new features.
- Conducted regression testing on over 250 test cases to ensure system stability and maintain functionality after updates.
- Debugged and optimised new and existing scripts, enhancing functionality and reliability.
- Upgraded Vagrant VMs and automated deployments using Ansible and Bash, optimising processes and cutting manual setup time by **30%**.

Technology Advisory Intern, PricewaterhouseCoopers

[Lagos, Nigeria] [July 2023 – August 2023]

- Participated in a cloud transformation initiative focused on modernising internal systems for improved scalability and performance across the team.
- Developed a To-do web application using the ABP framework, implementing task creation, editing, and deletion features that enhanced workflow efficiency for demo users.
- Utilised Azure Data Studio for efficient database management, querying, and visualisation.
- Collaborated with a team of 5 interns and senior consultants on a research project exploring the business impacts of cloud adoption.

Education

University of Limerick

Limerick, Ireland

Bachelor of Science in Computer Systems

2022- present

- QCA: 3.47/4.0
- 2024 J&J WiSTEM2D Scholar
- Christian Union (Board Member), Boxing Society (General Member), Women in STEM (General Member)

International College Spain

Madrid, Spain

International Baccalaureate

2015-2022

- Member of the ICS female Basketball Team
- Member of Robotics and 3D Modelling Club

Skills

Technical Tools: Python, Java, PostgreSQL, HTML/CSS, PyTorch, scikit-learn, Azure Data Studio

Research & Experimentation: Data preprocessing, statistical analysis, reproducibility in ML

Collaboration: Experience working in multicultural teams across Europe and Africa

Languages: Fluent in English and Spanish

ADDITIONAL

Volunteering: Maths Mentor and Tutor, Food and clothing distribution with the Red Cross, Donation collection for Milford Hospice, Limerick

Projects: 3D model of the Beetle Volkswagen using 3Ds Max (2023), Student timetable application using JavaFX (2024), HYPE and Humble (2025),
